About Us

SEIM is a Made in Italy company which produces Screw Pumps and operates in the market for 50 years, reaching a position of leadership.

SEIM installed World-Wide over three million of screw pumps, heat exchangers and safety valves, developed entirely in-house and based on the know-how gained over the decades, for numerous industrial sectors, such as Energy, Marine, Petrochemical, Oil and Gas, Industrial (Machine Tools, Lubrication and Hydraulics, Mining, Iron and Steel).

Thanks to its high-tech systems and the synergetic collaboration with customers and distributors, the R&D department develops new standard and customized products aimed at satisfying requests for new applications of use.

Milestones

Applications

SEIM PWO/E are three-spindle screw pumps designed to convey cooling lubricants (emulsions and cutting oils) for high pressures in machine tools / filtration systems applications.

Other typical applications: automotive, aerospace industry, deep drilling, light fuel oils pumping.

Typical configuration for vertical mounting on tank with pump immersed and delivery port above the tank.

Main Features & Benefits

- Pump housing and screw set specially hardened ensure optimal service life
- Hydrostatic thrust compensation to minimize frictional effects and thus wear and tear
- Axial and radial bearings to minimize rotational stiffness and thus running noise
- Suitable both for installation immersed on the tank and for external dry installation
- Shaft sealing with lip seal or mechanical seal with leakage monitoring system
- Version available with pressure relief valve with direct discharge into the tank
- Motor-pumps available with integrated or remote drive control to save energy based on the need of each specific working condition

Sections and Components

	PWO	PWE
Installation	vertical immersed / dry external	
Handled fluid	cooling lubricants, cutting oils, light fuorl oils, vegetable oils, biodiesel	
Minimum oil content in emulsion	4%	
Viscosity range	1 - 20 cSt (for higher values ask SEIM)	
Rotation (viewed from coupling end)	clockwise	
Delivery pressure	up to 150 bar	
Suction pressure	0 to 1 bar	from 0,5 to 10 bar with mechanical seal
Operating temperature range	0 - 100 °C	
Seal type	lip seal (standard), mechanical seal	mechanical seal
Bearing type	self greased bearing	
Material & hardness - screw set	nitrided steel 1000 HV1	nitrided steel 1500 HV1 + special treatment
Material & hardness - flanges	cast iron 190/210 HB	cast iron 190/210 HB + SiC insert for wearing parts
Material & hardness – casing	cast iron 500 HV1	cast iron 500 HV1

Recommended Filtration

Very hard materials:

SIC, hardened steel
(thermal or stellited)

Hard materials:

steels, aluminum, abrasive
materials
(CBN, diamond)

"Soft" materials:

mildsteels, non ferrous
metals, cast iron

The type of pump to be installed depends on the combination between worked material and operating pressure.

PWE models are preferred in all applications that require maximum resistance to wearing, like hardened steels – either thermal or stellited – machining.

Screw pumps PWO 072

Screw pumps PWO 083

Valves - BVPA Series

BVPA Series – Pressure relief block valve

SEIM three screw pumps PWO and PWE (from size 025 to 045 included) can be equipped with valve block BVPA, designed as pressure relief valve to protect pump from overpressures.

When BVPA reaches the setting value it starts to discharge flow directly into the tank.

Example of installation

Complete valve:	BVPA03	BVPA05
Mates with PWO pump size:	PWO025/029/032	PWO 040 / 045*
Line pump OUT:	G 3/4" (connection with pump outlet SAE 1" 3000 psi)	G 1 1/4" (connection with pump outlet SAE 1 1/2" 3000 psi)
Delivery flow:	80 l/min	250 l/min *
Kinematics viscosity:	1÷100cSt.	
Fluid temperature:	30÷80°C 86 °F ÷ 176°F	
Recommended filtration:	See filtration page 7	
Minimum pressure setting allowed:	Minimum setting value depends by the flow through the valve	
Pressure port 1/4" BSP	Available, std supplied plugged	

**max BVPA05 flow rate depends by the valve setpoint / (*) For different values contact SEIM*

BVPA Series Overall Dimension

DIMENSIONAL CHART (mm)

SIZE	A	B	C	D	E	IN	OUT
BVPA 031/2G	76	59,7	110	191,5	45	SAE 1"	GAS
BVPA05 SAE	98	79,5	170	235	79,5	SAE 1 1/2"	SAE 1 1/2"

Control valve – VCP

For hydraulic oils, lubricating oils, fuel oils and cooling lubricants emulsions.

- Electro-pneumatic proportional control (optional).

Control is with pneumatic circuit:

- ON/OFF function changes from free discharge to regulated pressure.
- Max pressure is controlled setting the pneumatic pressure.
- Pneumatic control-setting group can be also remote mounted from valve (suggested max 1 m tube).

STANDARD PERFORMANCES FOR STANDARD VERSIONS

SIZE	VCP22	VCP32
Delivery flow	120 l/min	250 l/min
Maximum pressure	5 a 100 bar	5 a 80 bar
Ratio regulated pressure / air pressure	20/1 (5 bar air = 100 bar regulation)	10/1 (8 bar air = 80 bar regulation)
Electrovalve specs	24 V DC (or 48 AC), duty 100%, normally open (no supply = valve in discharge), power 2 W DC, IP 65, Actuator port G1/8"	
Fluid temperature	0 – 60 °C	
Ambient temperature	0 – 50 °C	
Weight	4.5 Kg	5.0 Kg

** Reduced pressure limits apply due to fluid viscosity and driving speed - Consult the performance charts for the individual pump size.
For different functional characteristics, please contact our sales department.*

Valves - EV3 Series

EV3: 3 way valve with pressure control

For hydraulic oils, lubricating oils, fuel oils and cooling lubricants emulsions.

Control is with pneumatic circuit:

- ON / OFF function changes from free discharge to regulated pressure.
- Max pressure is controlled setting the pneumatic pressure.
- Pneumatic control-setting group can be also remote mounted from valve (suggested max 1 m tube).
- Option: proportional control valve pressure and on-off functions controlled by PLC or external control with seat for position sensor (of the pneumatic switch).

USB connection	USB M12 (RS485RS232)			
Options	MMI via cable connection, BUS module support (EtherCAT, CANopen, Profibus, Profinet, Sercos III)			
Certifications and approvals	CE, UL			

Pump Speed Drive Control

Nowadays power consumption is a priority issue also in designing and manufacturing and electro-hydraulic system.

Energy management with SEIM motor-pumps is possible using a variable frequency drive within the control loop of the screw pump. In the context of machine tools, this approach guarantees:

- Optimized hydraulic performances
- Energy saving
- Coolant saving
- Avoiding motor frequent stops which effect the motor durability
- Rapid return on investment for installation of frequency converter, provided by global leader in electric driver equipments

UP TO **70%** IN
ENERGY SAVINGS

The variable frequency drive applies where are required:

- Constant flow delivery – by adjusting motor speed and pressure
- Constant pressure delivery – by setting pressure and adjusting motor speed

An example of possible control via motor drive adjustment:

different types of SEIM valves

Example system above involves the installation of valves which are part of SEIM product range (either two or three –ways, like SEIM EV3 and VCP series) which allow flow discharge avoiding the repeated unwanted motor starts and stops.

High-quality machining achieved by PWO and PWE series, together with its high hydraulic efficiency, allows it to be used within a wide range of driving speeds – typically 1400 to 4000 rpm. Speed lower than 1400 rpm will require that maximum pressure achievable by the pump will be limited - Ask SEIM for accurate calculation.

Example of performance chart of a PWO029#6B: different pressure and speed conditions, with reference to IEC standard electric motor sizes.

The green area in the diagram above shows all possible combinations of pressure and flow rate achievable. When multiple working points occur within the green area, the motor selection is optimized consequently.
